

Rapture of the deep (2017)  
For violin and guitar

Composers note

The impulse for this piece came when reading about a peculiar state of mind, an alteration in consciousness that occurs while diving into the depths of the ocean. The piece creates a narrative with a simulation of a gradual descent and then a sequence of alternating mercurial and at times hallucinogenic states that towards the end fall into a euphoric state.

Duration 9 min. 30 sec.
